Women's meaningful participation in security institutions - Right to family life and care work responsibilities

Join us for a webinar to explore best practices and solutions to improve the right to family life and enabling women and men to serve on an equal basis by accommodating care responsibilities.

- ❖ How do care-related constraints in security institutions impact women and men's opportunities to join, remain and advance within the security sector, including their ability to meaningfully participate in peace operations?
- ❖ How can security institutions address these gaps in their policies and practices? How would interventions in these areas feed into the creation of inclusive, gender-equal and diverse security institutions?

Interpretation available in Spanish, Russian, French, Georgian and Arabic.
