Digitization presents a significant opportunity for Southeast Asia. Yet it brings forth serious security concerns. It is essential that good governance principles are upheld when addressing these concerns.

This webinar will present the results of a two-day discussion among international and regional experts. The focus will be on two crucial aspects: firstly, analyzing the cybersecurity threats prevalent in Southeast Asia, and secondly, highlighting the need for national and regional security strategies that effectively address these threats while adhering to good governance principles.

Fitriani,  
Southeast Asia Visiting  
Fellow, International Institute  
for Strategic Studies.,  
Indonesia

Miguel Alberto Gomez,  
Senior Researcher, Center for  
Security Studies, ETH Zurich,  
Switzerland

TBD
